Oats

126

Taylor Seeds

O'Brien County

(712) 261-2345

126 is a delayed heading oat and much of its forage mass and quality come from an extended maturity. 126 was developed by ProGene Plant Research, and shows resistance to rust and other leaf and stem diseases and is susceptible to Barley Yellow Dwarf virus. 126 resists lodging, and is high yielding.

Deon

<i>Sterler Seed Farm</i>	<i>Osceola County</i>	<i>(712) 261-1645</i>
<i>Welter Seed & Honey Company</i>	<i>Jones County</i>	<i>(563) 485-2762</i>
<i>Michael Baker</i>	<i>Jefferson County</i>	<i>(641) 919-6354</i>

Deon is a high yielding spring oat with overall good agronomic traits and was released by the Minnesota Agricultural Experiment Station in 2011. Deon has highly effective crown rust resistance, and resistance to smut and barley yellow dwarf virus. Deon is a PVPA protected variety.

Excel

<i>Letsche Seed Farm Inc.</i>	<i>Plymouth County</i>	<i>(712) 376-4309</i>
<i>Welter Seed & Honey Company</i>	<i>Jones County</i>	<i>(563) 485-2762</i>

Excel is a spring oat variety that was developed cooperatively by the Purdue University Agriculture Research Programs and the USDA-ARS. Excel has a tolerance to yellow dwarf virus.

Goliath

<i>Welter Seed & Honey Company</i>	<i>Jones County</i>	<i>(563) 485-2762</i>
--	---------------------	-----------------------

Goliath, a white-hulled spring oat, was developed by the South Dakota Agricultural Experiment Station and released in 2012. Goliath has good test weight, and excellent grain yield and forage yield potential. Goliath has excellent resistance to crown rust, barley yellow dwarf virus, stem rust, and smut. Goliath application for PVPA is pending.

Hayden

<i>Michael Baker</i>	<i>Jefferson County</i>	<i>(641) 919-6354</i>
----------------------	-------------------------	-----------------------

Hayden is a mid-to-late maturing white hulled oat cultivar released by the South Dakota Agricultural Experiment Station in 2014. Hayden has excellent yield potential and high test weight. Hayden is resistant to smut, moderately resistant to barley yellow dwarf, and moderately susceptible to crown and stem rust. Hayden application for PVPA is pending.

Horsepower

<i>Sterler Seed Farm</i>	<i>Osceola County</i>	<i>(712) 261-1645</i>
<i>Welter Seed & Honey Company</i>	<i>Jones County</i>	<i>(563) 485-2762</i>
<i>Cornelius Land & Cattle LLC</i>	<i>Jackson County</i>	<i>(563) 672-3463</i>

Horsepower, a white-hulled spring oat, was developed by the South Dakota Agricultural Experiment Station released in 2012. Horsepower has a high yield potential and outstanding strong straw strength. It has a short plant height, early-medium maturity, and an average test weight. Horsepower is resistant to local races of crown rust, moderately resistant to smut and BYDV, and moderately susceptible to stem rust. Horsepower application for PVPA is pending.

Jerry

Welter Seed & Honey Company *Jones County* *(563) 485-2762*

Jerry was developed by the North Dakota Agricultural Experiment Station. This variety is moderately susceptible to barley yellow dwarf and crown rust. Jerry is moderately resistant to stem rust. Jerry is a PVPA protected variety.

Jim

Welter Seed & Honey Company *Jones County* *(563) 485-2762*

Jim was developed by Minnesota Agricultural Experiment Station and released in 1996. It is an early variety. Test weight, groat percent, and lodging resistance are all very good. Jim is a yellow, nonfluorescent oat. The kernel is very plump.

Natty

Bill Buman *Shelby County* *(712) 579-3018*
Hermann's Hybrids *Delaware County* *(563) 927-2191*
Michael Baker *Jefferson County* *(641) 919-6354*

Natty was developed by South Dakota Agricultural Experiment Station and released in 2014. It is an early maturing white-hulled variety. Natty is resistant to smut and crown rust, moderately resistant to barley yellow dwarf, and moderately susceptible to stem rust. Natty application for PVPA is pending.

Reins

Swanson Farms *Story County* *(515) 291-6120*

Reins is an early maturing oat developed by the University of Illinois Agricultural Experiment Station and released in 2015. Reins has high test weight, good lodging resistance, and is a medium short variety. Reins is resistant to loose smut, tolerant to barley yellow dwarf virus, and moderately susceptible to crown rust. Reins application for PVPA is pending.

Saber

Swanson Farms *Story County* *(515) 291-6120*
Letsche Seed Farm Inc. *Plymouth County* *(712) 376-4309*

Saber is an early maturing oat developed by the University of Illinois Agricultural Experiment Station. Saber is tolerant to BYDV, is susceptible to loose smut, and is moderately resistant to moderately susceptible to crown rust. Saber is a PVP title V protected variety.

Shelby 427

Welter Seed & Honey Company *Jones County* *(563) 485-2762*

Shelby 427 oat is a white-hulled, spring oat developed by the South Dakota Agriculture Experiment Station (SDAES) and released in 2010. Shelby 427 is an early maturing variety with a superior grain yield and test weight. Shelby 427 is a PVP title V protected variety.

Streaker

Taylor Seeds

O'Brien County

(712) 261-2345

Streaker is a hull-less spring oat developed by the South Dakota Agricultural Experiment Station and released in 2009. Streaker is a multi-purpose hull-less variety that may be used for forage or grain. Streaker is moderately resistant to crown rust. Streaker is a PVP title V protected variety.

Wheat

Expedition

Welter Seed & Honey Company

Jones County

(563) 485-2762

Hard red winter wheat released by the South Dakota Agricultural Experiment Station and released in 2002. Expedition is an early maturing variety with white chaff color, good winter hardiness, average yield, and above average test weight. It has fair lodging and excellent baking quality. Expedition is a PVP title V protected variety.
