

Noxious Weed Free Forage and Mulch Program

This certification program assures forage and mulch is free of noxious weed seed of 57 noxious or undesirable plants. The program offered complies with the Weed Free Forage Standards developed by the North American Invasive Species Management Association (NAISMA).

This program has been used as an additional marketing opportunity for hay and straw producers. Potential markets include people that need certified hay for their horses on visits to national parks and contractors using straw for pipeline and road construction erosion control projects.

For more information about this program visit the ICIA website at www.iowaCrop.org or contact the ICIA office. The following producers have applied for and passed field inspection in the 2017 season.

Forage & Mulch Producers
